### Summary

I love my DJI Mini 3 Pro and its DJI RC, so I made a protector for it

I love my DJI Mini 3 Pro and its incredible DJI Rc(with the screen). I often use it in hikes and I want to be able to throw the drone and RC in the backpack, having it taking the less possible space. I've made a protector, that also allow to protect the sticks. The sticks protector must be printed separately(to decrease the support needs). So they could also be skipped if no stick protector wanted. They fit quite snugly, so no need to glue.

I would recommend to print this in PETG as PLA might get to rigid and break.
