Summary

This hardcase protects your "DJI Mini 3 Pro" drone against mechanical damage

It should be easy to put the drone in and out of the box.
Therefore, this is not a "lid" design, but two halves. You can easily grab the drone when the box is open.

Have a look at the YouTube video: https://youtu.be/qLaCz_ccFZk

The main purpose is protection against mechanical damage

The box is **not dust nor waterproof**. As you can see in the pictures, there are quite a few open spaces. It should help the drone to cool down better, as opposed to a completely closed the design.

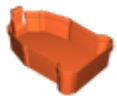

Filament (important): **PETG** (do NOT use PLA, it is too hard and fragile)
Print settings (not so important): I used 15% infill at 0.15mm

Please, also have a look at my **DJI Mini 3 Pro RC Bike Mount**, see <https://www.printables.com/model/218221-dji-mini-3-rc-bike-adapter>
