Tags: edh magic magicthegathering mtg mtgaccessories mtgcounters mtgedh mtgtokens token

I searched around for a creature token card but didn't see any I really like so I set out to make my own. This my first ever 3d model, I'm still learning basics because I am teaching myself. Please feel free to leave me any input or to remix this to improve it.

Same size as a Magic card with the art box cut out. I will make one at some point where the card can slip in, but couldn't get that to work right just yet.

Overlay is 88x63x4

Counters are 10x10x4

Toughness and Power spots are both 18 so you can use standard 6 sided dice or you can print the large counter set.
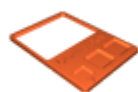

I've included the overlay with counters and without.

I printed this on Ender 3 pro at 100% scale.

Designed it on TinkerCad.
