[Hobby & Makers](#) > [Tools](#)

Same settings as Marius used in his original sanding pad, just changed the thread from M14 to 5/8-11 which is the other common arbor size for angle grinders.

There are two versions here, the original 45 mm disc diameter that Marius created and a second that is 2 inches in diameter in case you have trouble finding the 45 mm sanding discs.

Both have a 5/8-11 arbor thread.
