I've made a cheap box for moving daily usable stuff like medicine from the desk to the wall. Thread it on the wall or use tabe like me.

Print it full solid with the maximum layer height. You can use my 0.6 nozzle Prusament PETG profile for the fastest results. Please share a 0.4 profile if you have a well one.

Share me your wishes for your stuff partitions and I will see what's possible, or modify it to your own.

You can support me by liking and downloading my shared models. Thanks!
