AllenBradley 1794-series FlexI/O pin protector covers.

These usually get thrown away, and if you wish to store your 1794-module without damaging the pins, you will need another cover to protect your pins. these retain and fit just like the originals.

### PRINTING:

I have found that printing these at 92% scale is the perfect size to fit and retain properly. I used PLA, with a 100% infill, and no supports.
