Bracket to adapt a SPX form-factor PSU to a 2U FLEX case.

Tested with a Fantec SRC-2080X07 case and Silverstone TX500 Gold PSU.

Check your PSU to see if the power socket is in a similar position. I have adjusted the model so as not to block the ventilation of the SX500 yet be robust... but it may not fit your PSU.

You need 3xM3 screws of 15 or 20mm long to screw the bracket to the case.
