Summary

Extension legs with the same thread size as originals.

[Gadgets](#) > [Other Gadgets](#)

Tags: [xtool](#) [xtoold1](#) [xtoolparts](#)

These are extra legs the same size and thread as the ones sold by MakeBlock for the xTool D1. As usual, I have included my Fusion 360 files for anyone to play around with.

I used Cura 5.1.0 with tree supports. The supports are not really necessary, but keeps the threads dimensionally accurate. Tree supports increase the print time a lot. If you don't want to use them, just use one of the original metal pieces to correct the threads.
