Summary

I have a larger einsy case mounted to my mk3s and therefore the original profile holder did not fit my printer.

I have a larger einsy case mounted to my mk3s and therefore the original profile holder did not fit my printer. I solved this by adapting the original profile holder to fit on the back (or front) plate of the printer instead of the alu profile.

This remix is based on

(NEW VERSION!) SquashBall MK3s/MK3s+ Vibration Damper V3.0
