updated 3. 8. 2022 | published 3. 8. 2022

Summary

4010 fan module for Sneaks' modular Raspberry Pi case. This model holds the fan outside the original volume of the case.

Tags: [raspberrypi](#) [rasberrypicase](#)

I have a radio on my GPIO header that didn't fit along with the standard fan module, so I designed one that hold the fan in more of an external position. I combined the existing models for the module blank and fan module, so fit should remain identical and prints without support.

This remix is based on

Modular Snap Together Raspberry Pi 2B/3B/3B+/4 Case w/ OLED & Fan Options
