Summary

Just a minor redesign of one part.

Tags: [pegboard](#) [pegboardhook](#) [pegboardmount](#) [pegboardtools](#)

When I holster my Harbor Freight heat gun, the metal tip(which gets pretty darn hot) would hit the peg board and pull the bottom peg out a bit too. So I redesigned the bracket for a little more clearance.

In the side by side picture, Kaje's is on the left and mine on the right.

To print, follow the same directions regarding supports as mentioned on the original design page.
