did you know the steering wheel hub comes with factory EX-RR let u address the steering angle by adjust the 2 m3 x 8 screws and re adjust the VR in setting?

also the hub was 10mm hex??

what if u can using normal 12mm hex wheel to become your steering wheel for your ko propo radio?

the answer is here

you need 2 m3 x 8 button head screws for the angle limit
and 1 m3 x 12 button head screw and a m3 shim for mounting the wheel
