For your **Mavic 2** Zoom, if you have original **DJI Mavic Pro** ND filters, or you want to just save money by buying them instead of original ND filters for **DJI Mavic 2** Zoom.

Remove support geometry marked by green color.

IMPORTANT !!! - be careful when you are settling filter to mount. Glass is very thin, fragile and really easy to break. Once the filter is in mount and is still able to freely move, secure it with bits of glue. Once the filter is firmly settled, it is very easy and safe to use.

Tested and there is no reduction in video quality. <https://youtu.be/qPufbAtCZqM>

Added case - snap mechanism postprocess with file

Print Settings

Notes:

Mount - recommending ABS or PETG material, 4 perimeters. Nozzle ≤ 0.4

Case - PLA or 101.5% scaled ABS. 5 perimeters, 10% infill.

Category: R/C Vehicles
