Simple small rack/holder for organizing five containers/bottles with diameter of up to 21 mm (13/16").

The holder has a handle so it's easy to take with you wherever you need it.

The model prints without the need for support or elephant foot compensation and is best placed on the print bed as shown in the photo. Assembles without the use of tools or other parts (see photos).

Shown model is printed in Prusa Blue PLA.
