### Summary

Based on the actual MINI Logo I designed this cookie cutter

Since I'm a big fan of MINI Coopers, I decided to make a cookie cutter.

One part is only the outline. The second item is a helping tool to get the dough out without destroying it.

And the third one is the stamp for the Logo itself. First use the outline and than immidiately use this one to press the logo into the dough. That way the shape of the cookie is not distorted.

Make sure you use a food safe material (FDA) to print this parts!
