## Summary

The height of the area where the water is stored was increased to fit larger pumps.

---

[Toys & Games](#) > [Building Toys](#)

---

This model offers a deeper base for the “modular desktop fountain” by “3D Printy”.

The model was remixed from the base of "PHabermehl", which already had higher outer walls.

This model also has these higher outer walls. The height of the area where the water is stored was increased to fit larger pumps and make the installation process easier.

My pumps barely fit in the original base, and I had to fill the water almost to the brim to get the pumps fully submerged. The extra depth also allows for a larger water reserve, so you don't have to refill as often.

The dimensions can be found in the pictures.
