This is a caliper holder designed to fit on the Ender 3 Pro top bar. It is a remix of [this one](#) which was too thin to fit my calipers. I also made the T-nut fitting a little bit larger so it would fit a little more snugly.

Keep an eye out for collisions in very tall prints since the calipers do hang down a little into the print area.

Print Settings

Printer Brand:

Creality

Printer:

Ender 3 Pro

Rafts:

Doesn't Matter

Supports:

Yes

Resolution:

0.2

Infill:

20%

Filament: Hatchbox PLA White

Notes:

Included an image of the print orientation. Use supports from build plate only 650 or higher and it should only put the supports under the T-nut thing.
