I print off filament switches for every new filament I get. I decided that the easiest way to label the filament in my dry box was to just use these switches. The switch slides in and out of the holder easily yet are secure enough that it doesn't fall out when moving. It is made for a 79.5mm x 30mm x 2mm switch which is the default size for these switches. Once printed, attach it to your dry box, printer, shelf, etc. using double-sided sticky tape or glue. Many thanks to Makkuro for the switches!

Edit:

9/1/22 Added a double holder version for two switches.

1/7/23 Added loose fit version of holders that don't hold the cards as tightly so they can be removed more easily
