Stray Logo

The default thickness is set to 5mm. You can adjust this according to your liking in the slicer (z height).

The stl file is sized so that it can be printed on an Ender 3 as a whole. If you want to print it in large size, cut the model into piece and glue them together. Please reach out if you want me to resize to your requirement.

You can also add a LED strip to the back and give a nice back glow around the model.

I have also included the svg files for laser cutting or remix.

Model files

stray.stl

Other files

stray.svg

☐ Use this for remixes and laser cutting
