### Summary

A posable stick man with all the parts in a single STL for easy printing.

Tags: [model](#) [thingiverse](#) [stickman](#) [humanbody](#)

This is just a simple remix of [Stick Man \(Position-able\)](#) by [Ratm3at](#) to make all the parts easily printable and all in one STL. All credit for the original design goes to [Ratm3at](#).

The model is well designed for 3D printing since no supports are needed to print it. It's easy to assemble and the joints work great so posing the model in different positions works well.

This is what I did to create the remix::

- Cut off 0.1 mm from the bottom of parts other than the shoulders, pelvis, and foot pieces.
- Rotated the foot 90° and cut off the bottom 1.0 mm.
- Duplicated parts and arranged them all to make one complete model in one STL centered on the origin.

2023-04-06 Update: I added 3 additional files to facilitate printing on smaller print beds

There are now 4 files available for download:

- STL of complete model
- STL of top pieces only (head and shoulders)
- STL of bottom pieces only (arms, legs, hips, feet)
- 3MF of complete model (multi-part object, pieces can be removed or rearranged)

I really liked the pose of the original, so for the photo I posed mine similar to it, but my pose doesn't look nearly as good. The original looks like a martial arts expert ready to strike, while mine looks like he slipped while walking and is falling backwards. Ah well, I tried. 8)
