Tags: [tweezer](#) [tweezerholder](#)

### Introduction

I needed a place to store my tweezers and didn't want them hanging from the top of my Ender 3v2. I found [an extra drawer model at Thingiverse by PoisonD](#) and chopped of the top in Tinkercad. It's a great little shelf/container to hold my tweezers.

### How to use

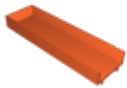

1. Print this model.
2. Remove the endcap at the front of your printer.
3. Slide the print onto the rail.
4. Return the endcap to its previous location.

### Print settings (suggestion)

- Filament: PLA.
- No supports needed (see cover photo for print orientation).

- First layer: 210° hotend temp, 60° bed temp.
- All other layers: 200° hotend temp, 50° bed temp.
