### Summary

Mounting Bracket with waste bucket for Filament cutter

[3D Printers](#) > [Accessories](#)

Along with Kaskades desire to have a mount that caught waste and could be operated with one hand, I also wanted to be able to dump it with ease so I modified his model and added a shelf and hex so the whole she-bang could be hung off of either side of the top of the printer and emptied easily through the existing bolt hole. This also eliminated the need to use any extra hardware. I had to tweak Gabmaker91s Filament Cutter file a bit to get it to fit nicely, so Ive included those 2 modified files also.

Print the mount Topside down with Support under the Hex/Shelf. I printed @ .3 layer and it seems to be plenty strong.
