## Summary

It's not what you think. It's a guitar holder!

Tags: [holder](#) [guitar](#) [tentacle](#) [uwu](#)

The hand is best printed with 3+ walls and 30% infill. The wall mount should have 4+ walls and 30% infill. The pad should be TPU with 2 walls at 15% infill, you can flatten the back into the build plate in the slicer and it won't need supports. The pad is glued into the holder.
