I modified another design that I cant find anymore, i'll add the attribution when i find it. I printed the LeftFanDuct with a lot of support, its not the cleanest part but it's was the best for keeping the overhangs that grab the main part. You can hot glue the pieces once they are in place for a little extra strength too.

This was designed to fit over top of this endoscope mount: <https://www.printables.com/model/253621-cr10-smart-endoscope-mount>

Feel free to modify the parts or merge them suit your needs.
