### Summary

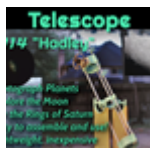

Rocker Box for the amazing Hadley Telescope by Maff.

[Learning](#) > [Physics & Astronomy](#)

Rocker Box for the amazing Hadley Telescope by Maff. I used 2 of the same 3' 1/2" tubes from the telescope, cut in half to make 4x 18" tubes. I used the leftover silicone glue from the telescope to glue everything in place. The tubes fit kinda loose, so I used a short level to make sure they were glued in true. I put some blue painters tape on the contact points to increase the friction a bit.

Its pretty dang sturdy!

### This remix is based on

**Astronomical Telescope "Hadley" - an easy assembly, high performance Newtonian reflector/ planetary telescope / super telephoto lens**

by Maff
