Summary

I found the lock is not seated well when tighten it with T-nut, so i cut some of the base to make it fit.

I found the lock is not seated well when tighten it with T-nut, so i cut some of the base to make it fit. This required M3x8 screw and T-nut to tighten it.

The model available for 4mm and 6mm panel. Feel free to download and print.

*v2 - make the attach point higher to press a bit down the panel for better fume isolation.
