This is a remix of the fine Session Mount by Davschall <https://www.thingiverse.com/thing:2813919>

On this remix I added a small 1mm lip to 3 of the 4 sides to help with retention of the camera. One of the STL files has the right side filled in for extra camera protection.

NOTE: You must print the mount with a flexible filament like TPU -- this is required.

I used Clear Yoyi 1.75mm TPU: <http://amzn.to/2G8LyTE>
My Printer: <http://amzn.to/2BBYP4t>

Print instructions Category: R/C Vehicles Print Settings

Printer: Maker Select

Rafts: No

Supports: Yes

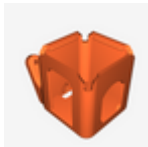

Resolution: 0.2

Infill: 20%

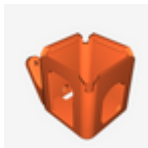

Notes:

I found 1.2mm walls top and bottom worked great.
