Summary

Stand for holding the sample tube of Covid Tests, Easy and fast printing.

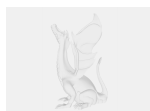

[Healthcare](#) > [Home Medical Tools](#)

Tags: [covid](#) [schnelltest](#) [corona](#) [rapidtest](#)

I know there are already several models for Covid Test stands in printables, but nothing does really fit for me. There are all too big. Normally I make 1 or 2 tests in parallel, and sometimes 3. So I made my own model. And this is very easy with OpenScad, especially if you use the OpenScad-function "roundedcube" from <https://danielupshaw.com/openscad-rounded-corners/>.

Print the stand upside down as shown in the picture. Infill doesn't matter and support is not necessary.
