### Summary

Simple fast printing euro shopping card chips

These euro chips are simple and fast to print. They are particularly suitable as a small gift as they contain a message.

Jesus.stl: The Christian symbol of the cross

Fish.stl: The fish was a Christian symbol of the first communities

Peace.stl: The international sign for peace

I found that some printers print them a little too thick. If that's the case, just zoom down a bit in the Z-axis.
