Summary

Sanding Mouse. Utilising 125mm hook & loop orbital sanding discs.

Tags: [mouse](#) [sanding](#) [woodworking](#)

I've created 2 versions of the sanding mouse. This one is the shorter of the two and primarily for sanding projects that are a bit more detailed and it's easier to use on it's side.

Print using TPU to give a nice hand feel and a little bit of flexibility. The TPU is also durable and I've not had any issues with melting etc.

Use sticky back 20mm Velco tape to attached the sanding discs to the mouse.

Suggested Printer Settings.

- 0.6 Nozzle with 0.4 layer heights and 10% Gyriod Infill.
- 4 walls and 4 layers top and bottom.
