Summary

A remix to extend the light bar bracket for the NA Ender3 Warm Enclosure found on Amazon.

Tags: [enclosure](#) [lightbarmount](#)

This is a simple extended bracket remixed from the stock bracket that ships with <https://a.co/d/9bAT0Br> from Amazon. I'm switching to a direct drive and didn't want the light bar mounted so close to my top rail where I plan on mounting my BTT Smart Filament Sensor. Printed on ABS so it doesn't warp like the original mounts, did 15% infill, no supports, and no rafts.
