Summary

This is a remix of a great design for anyone who uses the soft zipper enclosures you can find on Amazon.

Tags: [enclosure](#) [hangingspoolmount](#) [spoolholder](#)

I remixed this design to use less materials and also fit on an Ender 3 Pro bed. The original was designed to utilize <https://www.thingiverse.com/thing:4841117> as a spool holder. Devrandom listed this as being able to fit the Creality enclosure which has a 16mm diameter pipe but the knockoff NA Ender3 Warm Enclosure (<https://a.co/d/9bAT0Br>) I purchase which has 17mm fits perfectly as well.

Print: 20% infill in the orientation it's already loaded in, supports aren't necessary but I used them anyways.

This remix is based on

Corner Bracket for Creality Box
