updated 24. 12. 2022 | published 24. 12. 2022

Summary

A nice display box for the Olsson Ruby tipped nozzle (or any other fancy nozzle you want to show off)

Rubies are a 3DPrinters best friend... ;)

First, print the ring and optionally paint it. Then print the box, cut the foam to size and spray glue the velvet around it. Cut a slot in it with a knife, put it in the box, and then put the ring in the slot, done :-)

I printed the box on the UM2+ and the ring on the Form1+, so I included a custom support base and pin for the Formlabs printer, you might want to remove those if printing in another printer.

Materials:

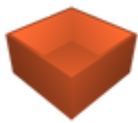

- Printed Ring
- Printed Box
- Velvet Fabric
- Foam
- Spray Glue
