### Summary

Clip on flash modifier that is based off a 3D scan of an SB-400 so should fit perfectly.

Tags: [bounce](#) [flash](#) [nikon](#) [speedlite](#)

Great for outdoors or where you can't bounce flash off the ceiling. Aim flash upward in bounce mode and it effectively enlarges your flash. Use white TPU for best results, if you print with a rigid filament, it will not slip over the front of the flash.
