Summary

I wanted a small nozzle for my shopvac. Fits into a 40mm hole

[Household](#) > [Other House Equipment](#)

Tags: [shopvacattachment](#) [vacuumcleaner](#)

I cant add a lot to the short description above.

It fits into a 40mm hole. around 170mm long, printable on prusa mini (standing upright).

You can use 0,25mm layer height, I used PETG and 3 Perimeters (solid shell).

On the topic of performance: it sucks.

In the background of the photos you can see why I need more shopvac/ cleaning equipment.
