Summary

Long long overdue since its first appearance on the Powerpacks, here now finally the stand alone version.

Here the now long overdue stand alone kickstand that was firstly introduced with the 18650 Powerpack back in April. Even so it was requested back then I totally forgot about it and was reminded just yesterday so I quickly added it to the collection. All you need is some Glue to put together the front and the back part and 2 pieces of round 8x1mm Magnets.

Fits in the original case mounted on your deck with no problem.
