### Summary

A slim version of my EDDC box design, holding a 7 piece RPG dice set.

I can't understand it, but there are people just having one set of dice they use to play. So the regular **EDDC** boxes are too big. So I made a slim version holding one set of dice nicely divided. The dividers are not evenly spaced, so there is a slot for each die, left to right from d20 to d4. It holds dice slightly bigger than standard dice. So a good choice for handmade resin dice.

Print in place hinges.

Needed hardware: Diameter 6mm by 3mm disc magnets.

The top side has a hex pattern to identify as the top. If you have ideas or inspiration for other patterns or text I can either add those to the collection or make custom files.

There is also a plain version without dividers and you get 8 or maybe 9 dice in there.

As with the other EDDC boxes you'll find a cutout template if you want to add a liner to the bottom. Made for A4 and US Letter sized paper.

Update1: The pattern was open to the sides and left some pointy corners. These tend to leave some nasty bumps on the edge. I changed the pattern to a closed boarder to leave a clean edge.

Disclaimer: The dice in the pictures are my own creation, if you're interested in that, check out my [Instagram](#) profile and contact me there. Same for print on demand. I don't have a shop and do commissions and print on demand as my time allows.
