updated 6. 8. 2022 | published 6. 8. 2022

### Summary

A basic towel rod holder that holds a 1.25 inch rod.

[Household](#) > [Bathroom](#)

Tags: [rodholder](#) [towelrack](#)

This was made because I needed a good towel rack. I've used this with an acrylic rod and have been using it for over a year without issue. It so far has been able to support the weight of ~6 towels at a time without any issue. The diameter is for imperial units (I'm in the US so everything in the hardware store is in inches.)

Print settings:

Filament: PLA

parameters: 4

Infill: 30%

Supports: yes, but if your printer can bridge well, you may not need to.

If anyone would want it modified for common metric sizes, let me know.
