My daughter has hearing loss, we were out awhile ago and she decided to hide her hearing aid case after putting her hearing aids in. so I made this. just a little doublesided tape on the bottom of the air tag to keep it in place in the middle. its probably not as refined as it could be but gets the job done for me and keeps her from hiding it. I took the lid into tinker cad and put her name and my phone number on it too as a backup for the air tag incase it gets found in public. I printed with supports for the curved edges to make them come out a Little better
