A relatively simple print. I never used supports as the ugly bridges are not visible, two filament changes, starts with black, then changes to white to allow visibility of the legend, then silver for the bulk.

Switches and connector data sheets included and are available from Digikeu (www.digikey.com)

Happy printing.

One photo shows a later addition of a switch guard to help prevent inadvertent power down of the printer when missing the light switch. Perhaps a future post.
