Summary

A phone camera clamp mount with a 1/4 inch screw for an 8mm thick laptop frame

Tags: [camera](#) [mount](#)

I had a spare camera clamp and wanted a way to mount my phone to the frame of my Lenovo laptop, so I built this mount using the 1/4 inch screw from <https://www.printables.com/prints/171864-14-inch-camera-screw>

The Lenovo is a chunky 8mm thick, so this may work on similar sized laptop frames.

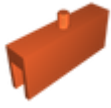

This remix is based on

1/4 Inch Camera Screw
