Summary

A box with a hex pattern. I use it to keep snacks organised in the pantry.

[Hobby & Makers](#) > [Organizers](#)

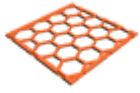

A box I made to help organise the snacks in the pantry . This is the 3rd iteration. The first 2 boxes I modelled were printed in full, but the bottom looked nicer than the sides or front. So this version splits each part into its own print, so the outside facing part can be printed facing the bed. Easily construct the box by clipping the parts together (with a satisfying sound!)

You need to individually print each file and then assemble the box. I originally tried to model this as one file, but printing each piece facing down gives a nicer surface.
