Simple toy for kids to play out the car windows. (Play responsibly.)

Pretty much every model i find of this toy is just a flat shape. But what make this nice is to look as close as possible to the real thing.

Printing something with curve all around is impossible. As much as i hate splitting model to print them, that the best solution for this.

The alignment hole will most likely need heavy deburing, it help to just use a very short piece of fillament in it (like just a couple millimeter.)

Put a string in the back hole to attach it to a finger/wrist to not lose it.
