Created in Tinkercad. I'm a total noob to this and this was literally the first 3D model I put together. My nephew asked me to print out a saxophone model for his teacher and I decided to use the situation to learn some modeling. I remixed a saxophone model found on open3dmodel.com and then added the rest. It's kind of simple and it was perfect for the nephew AND his favorite teacher.

Remix source: https://open3dmodel.com/3d-models/saxophone-printable_491361.html

Printer: [Ender 3 S1](#)

Rafts: No

Supports: Yes

Resolution: 0.2

Infill: 20%

Filament brand: Hatchbox

Filament color: Metallic Bronze

Filament material: PLA

This remix is based on
