Summary

Holds a 12V-10A power adapter brick that I use for powering my Astrophotography rig with a Sky-Watcher EQM35-Pro mount

Remixed this from another tripod leg-mount adapter. This one is designed to hold a 12V-10A power adapter brick that I use for powering my Astrophotography rig with a Sky-Watcher EQM35-Pro mount. The grips attach nicely to the leg, so I remixed this in Blender, keeping the grips, but replacing the dovetail bracket with a clip that would snap-fit the power brick. Inner container will hold a 66mm x 40mm power adapter. I used gyroid infill for strength.

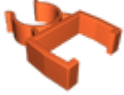

This remix is based on

ASI AIR iOptron CEM26 Tripod mount
