Introducing the Airtag cat. A fun model in which we can carry our device protected. Both in keychains and in the collar of our pets. Ready to make the color change of our cute kitty. I recommend to activate the option to print thin walls (attached screenshot of its location in prusaslicer) For a correct impression of the lower part of the lid, is recommended to use supports (if the finish of that area does not matter, it would not be necessary to use them) will not affect the aesthetics of our piece. Enjoy it!!!
