Summary

My WVC-600 came without the cable I ordered but I didn't want to wait so I made one. This is not safe to use!

[Hobby & Makers](#) > [Electronics](#)

My WVC-600 came without the cable I ordered but I didn't want to wait so I made one. I used 3mm steel dowel pins I had laying around and soldered on a 3x1.5mm² power cable and insulated with heat shrink. yellow tape for additional insulation.

Forgot to take a picture of the inside, looks basically like this original one..

WARNING: not safe to use, don't use outdoors or unattended, don't mess with mains voltage!

printed in ESUN ABS+, no supports needed
