Summary

Nice low-poly bear

Tags: [animal](#) [bear](#) [lowpoly](#) [toy](#)

It's an old model from thingiverse (not mine). I like it but I didn't find it here. So I decided to share it in Printables. The original is here: <https://www.thingiverse.com/thing:192392>

I used purple Anyubic PLA and my Anycubic Vyper. The bear was printed with basic Cura settings for PLA (200/60) and with supports (I used tree structure). Layer thickness 0.2mm, infill 15%.
Also I scaled this model to a height 60mm.

A slight mechanical treatment of surfaces at the points of contact with supports may be required after printing.
