This is a stand for the 7.5inch NFC-Powered e-Paper display by Waveshare. The display comes in a case which doesn't feature a way to stand up on a desk. So I quickly made this simple desk stand for it.

The fitment between the stand and the display case is just snug enough for the stand to stay attached when the display is picked up.

The foot needs to be printed twice. I used super-glue to connect the three pieces together.

Printed with white PLA at 0.2mm layer height on a Prusa Mini+.
