Summary

another little watering can ;-)

[Household](#) > [Outdoor & Garden](#)

Tags: [blender3d](#) [gardening](#) [homedecor](#) [indoorplants](#)
[watering](#) [wateringcan](#)

This little can is especially designed for:

- printing without supports
- turn out watertight
- usability
- nice looking

Print recommendation:

- layers < 0.16
- top layer fill concentric -helps to reach water tightness in bottom
- seams pointing to backside if printed in metallic-look materials

At least you can upscale it you have a bigger print bed if desired. This model is 115mm high and fits barely on a prusa3mk3s bed. Alternatively you can win space by turning it 45deg.
